

Congratulations Michael Adams!

I wanted to make you aware of an accomplishment from our very own I.S. freshman student, Michael Adams. He has been part of a robotics team that meets at the Kehoe Center since October. Some of our other students also participated in the fall. Since January, this team called "Stellar Robotics #5413" has invested over 120 hours creating a 6 ft. tall robot called "Guido", which can move and stack totes and containers. This team of 13 kids in the Mansfield area competed in a tri-state competition near Pittsburg, PA this past weekend, "Stellar Robotics" placed 6th out of 50 teams and received 2 awards, Rookie All Star and Highest Rookie Seed. They will now compete at the Buckeye Regional in Cleveland on March 27th and 28th and also in Saint Louis, Missouri on April 22nd-25th at the Championship with teams from around the world.

If you would like to follow and cheer them on go to <http://www.firstroboticsmansfield.com/>. This link tells about the team and has the link for the live stream to watch the exciting, eventful competition.

Please join me in praying for Michael and his team's safety in traveling tonight and for their great experience. Great job, Michael!
